Subject: You sold out

The Justice Department sold out to big business. Justice in this country no longer has any meaning at all. The attorney general is nothing more than a puppet for the extremist right wing element lead by Bush and Chaney.

This is but a symptom of the loss of human rights. Ashcroft promises only to take human rights away from non-US citizens, so who cares about them. What happens when private citizens disagree with this the extremist element? Do we go to jail? It is the next step!!!
We all lose!!!
